

# COVID-19 Vaccine Information

## for Sickle Cell Community-Based Organizations

JANUARY 2021

FOR MORE INFORMATION: [cdc.gov/COVID19](https://www.cdc.gov/COVID19)

# **COVID-19 and Vaccine Basics**

# What is known about COVID-19?

- Infection with SARS-CoV-2, the virus that causes COVID-19, can result in a range of illness, from mild symptoms to severe illness and death.
- We don't know how SARS-CoV-2 will affect each person.
- Some people, such as adults 65 and older or people with certain medical conditions, are more likely than others to become severely ill.

# Why should the sickle cell community be especially concerned?

- People with sickle cell disease are at a high risk for severe COVID-19 complications because of the common issues shared by the two conditions.
- SCD and COVID-19 can both cause increased blood clotting, damage to blood vessels and lung problems. SCD patients are also at a higher risk for acute chest syndrome.
- The case fatality rate for people with SCD who get COVID-19 is almost double the case fatality rate for the general US population.

# How to prevent COVID-19

- Wear a mask that covers your mouth and nose.
- Avoid close contact with others. Stay at least 6 feet (about 2 arm lengths) from other people.
- Avoid crowds and poorly ventilated spaces.
- Wash hands often with soap and water.
- Use an alcohol-based hand sanitizer with at least 60% alcohol if soap and water are not available.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Clean and disinfect frequently touched surfaces daily.
- Get a COVID-19 vaccine.

# COVID-19 vaccination is a safer way to build protection

- Getting the virus that causes COVID-19 may offer some natural protection, known as an antibody or immune. But experts don't know how long this protection lasts.
- The risk of severe illness and death from COVID-19 far outweighs any benefits of natural immunity.
- COVID-19 vaccination will help protect you by building immunity without the risk of severe illness.

## Why should sickle cell patients get vaccinated?

- The Centers for Disease Control and Prevention (CDC) list sickle cell disease (SCD) as one of the populations vulnerable to severe COVID-19.
- The risks of serious consequences from contracting COVID-19 are far worse than the temporary or rare reactions to the vaccine.
- The fact that SCD affects the immune system should not cause a safety problem for COVID-19 vaccines.
- Consult with your doctor or health care team about whether your personal medical condition causes an exception to this general recommendation.

# Key facts about COVID-19 vaccination

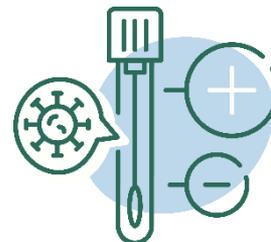

Getting vaccinated can help prevent getting sick with COVID-19

People who have already gotten sick with COVID-19 may still benefit from getting vaccinated

COVID-19 vaccines cannot give you COVID-19

COVID-19 vaccines will not cause you to test positive on COVID-19 viral tests\*

\*<https://www.cdc.gov/coronavirus/2019-ncov/hcp/testing-overview.html>

# Safety of COVID-19 vaccines is a top priority

COVID-19 vaccines are being held to the **same safety standards** as all vaccines.

## Before Authorization

ACIP

- **FDA** carefully reviews all safety data from clinical trials.
- **ACIP** reviews all safety data before recommending use.

## After Authorization

- **FDA** and **CDC** closely monitor vaccine safety and side effects. There are systems in place that allow CDC and FDA to watch for safety issues.

**VAERS** Vaccine Adverse Event Reporting System

# COVID-19 vaccination will help protect you from COVID-19

Getting a COVID-19 vaccine...

- Will help create an immune response in your body against the virus

- May help keep you from getting severely ill, even if you do get COVID-19

# What to expect before, during, and after COVID-19 vaccination

## Before

- Learn about COVID-19 vaccines.
- See if COVID-19 vaccination is recommended for you.

## During

- Read the fact sheet that tells you about the specific COVID-19 vaccine you receive.
- Receive a vaccination record card.

## After

- Expect some side effects.
- Enroll in v-safe. V-safe will remind you if you need a second shot.
- Continue using all the measures to protect yourself and others.

# Vaccination is one measure to help stop the pandemic

- While COVID-19 mRNA vaccines appear to be highly effective, additional preventive tools remain important to limit the spread of COVID-19.
- The combination of getting vaccinated and following CDC recommendations to protect yourself and others offers the best protection from COVID-19.
  - Cover your nose and mouth with a mask.
  - Stay at least 6 feet from people who don't live with you.
  - Avoid crowds and poorly ventilated indoor spaces.
  - Wash your hands.

# Protect yourself, your family, friends, coworkers, and your community. Get vaccinated.

- Choose to get vaccinated when it is offered.
- Participate in **v-safe** and help CDC monitor for any health effects after vaccination.
- Share your experience with coworkers, friends, and family.
- Know the basics about the COVID-19 vaccine. Help answer questions from your family and friends.
- Show you received the vaccine by wearing a sticker or button prominently.

## CDC COVID-19 Vaccine Websites

The screenshot shows the CDC Vaccines and Immunizations website. The main heading is "COVID-19 Vaccination". Below the heading, it says "Clinical Resources for Each COVID-19 Vaccine" and "Find information for COVID-19 vaccination administration, storage and handling, reporting, and patient education for each specific vaccine". There is a button that says "Product information by US Vaccine". Below this, there are four images with captions: "General Vaccine Administration", "Storage and Handling Toolkit", "ACIP Recommendations", and "COVID-19 Vaccine EUAs". The left sidebar has a menu with "COVID-19 Vaccination" selected.

<https://www.cdc.gov/vaccines/covid-19/index.html>

The screenshot shows the CDC COVID-19 Vaccines website. The main heading is "COVID-19 Vaccines". Below the heading, it says "Updated Jan. 11, 2021" and "Languages". There are social media icons for Facebook, Twitter, LinkedIn, and YouTube. Below this, there are three main sections: "Have Questions? Get answers to common questions about COVID-19 vaccines.", "Get Accurate Vaccine Information", and "About the U.S. Vaccination Program". The top navigation bar includes "Your Health", "Community, Work & School", "Healthcare Workers & Labs", "Health Depts", "Cases & Data", and "More".

**Getting Vaccinated**

# Where and when to get your vaccine

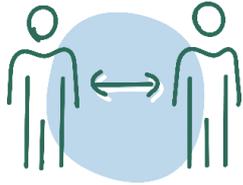

- Per guidelines from the Medical and Research Advisory Committee, SCDAAC recommends that sickle cell patients receive the vaccine.
- Vaccine qualification and availability varies from state to state. Check with your doctor and local authorities to determine where and when to get vaccinated.
- **[MEMBER ORGANIZATIONS MAY ADD MORE INFORMATION AS IT PERTAINS TO THEIR SPECIFIC LOCATION]**

# After Vaccination

- Continue COVID-19 prevention measures:

Cover your  
nose and mouth  
with a mask.

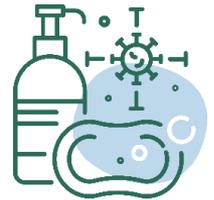

Stay at least 6  
feet from people  
who don't live  
with you.

Avoid crowds  
and poorly  
ventilated  
spaces.

Wash your  
hands.

Clean and  
disinfect  
frequently  
touched surfaces.

- Enroll in **v-safe**
- If you have questions about your health and vaccination, call your doctor, nurse, or clinic.
